

COVID-19 NOTICE - MESSAGE TO OUR PATIENTS

At Dr. Shaari's office, we are going above and beyond to ensure the safety of our patients and staff. Below is an overview of the safety measures we have implemented in our clinic.

Rigorous screening process

- All patients who have appointments are asked to arrive 15 minutes before your appointment, wait in their cars and call the office at 201-342-8060, telling us you are in the parking lot. Staff will get all of the information they can over the phone and screening questions will be asked. Once an exam room is ready, you will be called and instructed to enter the building where your temperature will be checked. This prevents unnecessary contact with other patients in a waiting room.

Infection control best practices, additional precautions

- Our physician and staff are expertly trained in infection control best practices, including the effective use of personal protective equipment such as masks, gloves, and goggles.
- Please wear a mask during your visit and only remove it if asked to do so by your physician.

Cleaning protocols

- All clinical care areas are thoroughly cleaned with EPA-approved disinfectants after every patient encounter, as well as nightly deep-cleaning building protocols.

Visitor Restrictions

- We are asking that patients do not bring anyone with them to their appointment, unless if necessary due to disability or age. One parent or guardian may accompany the patient.

Telemedicine

- We are offering telemedicine visits for patients as well. Let us know if that is more convenient for you at this time.
- We will continue to monitor this ever-changing situation with national CDC guidelines and local guidelines. Thank you for your continued understanding. Our main priority always has been and continues to be the health and safety of our patients and staff.
